Disciplinary Case Management & Tracking System (DCMTS)

1.2 Objective

To design and develop a centralized digital system for:

- Tracking of complaints/petitions/detailed reports against employees
 - Preliminary enquiry tracking (**= with CVO/DPE/OPN./Audit**)
 - Disciplinary (DC) action processing
 - Manual entry of reminders & notices
 - Appeal management
 - Role-based visibility & privacy control
 - Integration reference with SAP Service Register
-

2. Current Problems (As-Is Process)

- Manual allegation register maintained (**= Alphabet wise allegation register maintaining for entering the names of the erring staff noticed – Name, Surname, name, Caste, DOB, DOJ(optional), Employee ID, place of working (lapse pertains to), section, division, circle, corporate office, Remarks ((i) to enter-update time to time punishment (ii) Dropped (iii) Warned (iv) Censure) date of closure fields are required to maintain in the developing software)**)
 - Paper-based acknowledgements
 - No centralized tracking system
 - No visibility of the cases during promotion.
 - Difficulty in circle-wise / employee-wise tracking
 - No structured database of disciplinary history
-

3. Proposed System (To-Be Process)

A centralized Python-based web application with:

- Unique file number generation (year-wise) complaint/Petition/Reports wise.
- Multi-employee tagging under same file should be allowed
- Automated workflow routing
- Digital document upload & acknowledgement tracking

- Timeline tracking (15 days / 7 days / 90 days)
 - Appeal tracking -manual update in portal
